Advanced ST Editor options

The CPDev package uses STCPD_Edit.ocx control, which is patched version of SynEdit component (http://synedit.sourceforge.net) to use as ActiveX control in .NET platform.

Below table describes advanced options in editor (Meanings of the options were taken from documentation in SynEdit code with little explanation):

Option name	Description
eoAltSetsColumnMode	Holding down the [Alt] key will put the selection mode into columnar format (as in [Shift]+[Ctrl]+C shortcut).
eoAutoIndent	Will indent the caret on new lines with the same amount of leading white space as the preceding line.
eoAutoSizeMaxScrollWidth	Automatically resizes the MaxScrollWidth property when inserting text.
eoDisableScrollArrows	Disables the scroll bar arrow buttons when you can not scroll in that direction any more
eoDragDropEditing	Allows you to select a block of text and drag it within the document to another location
eoDropFiles	Allows the editor accept OLE file drops (from Explorer).
eoEnhanceHomeKey	Enhances [HOME] key positioning, similar to Visual Studio.
eoEnhanceEndKey	Enhances [END] key positioning, similar to JDeveloper.
eoGroupUndo	When undoing/redoing actions, handle all continuous changes of the same kind in one call instead undoing/redoing each command separately
eoHalfPageScroll	When scrolling with page-up and page-down commands, only scroll a half page at a time
eoHideShowScrollbars	If enabled, then the scrollbars will only show when necessary. If you have eoScrollPastEOL, then it the horizontal bar will always be there (it uses MaxLength instead).
eoKeepCaretX	When moving through lines with out eoScrollPastEOL, keeps the X position of the cursor.
eoNoCaret	Makes it so the caret is never visible.
eoNoSelection	Disables selecting text.
eoRightMouseMovesCursor	When clicking with the right mouse for a popup menu, move the cursor to that location.
eoScrollByOneLess	Forces scrolling to be one less.
eoScrollHintFollows	The scroll hint follows the mouse when scrolling vertically.
eoScrollPastEof	Allows the cursor to go past the end of file marker.
eoScrollPastEol	Allows the cursor to go past the last character into the white space at the end of a line.
eoShowScrollHint	Shows a hint of the visible line numbers when scrolling vertically.

`eoShowSpecialChars`	Shows the special characters.
`eoSmartTabDelete`	Similar to Smart Tabs, but when you delete characters.
`eoSmartTabs`	When tabbing, the cursor will go to the next non-white space character of the previous line.
`eoSpecialLineDefaultFg`	disables the foreground text color override when using the `OnSpecialLineColor` event.
`eoTabIndent`	When active [Tab] and [Shift]+[Tab] act as block indent, unindent when text is selected.
`eoTabsToSpaces`	Converts a tab character to a specified number of space characters.
`eoTrimTrailingSpaces`	Spaces at the end of lines will be trimmed and not saved.
